

[MS-FSIN]: Input Normalization Data Structure

Intellectual Property Rights Notice for Open Specifications Documentation

- **Technical Documentation.** Microsoft publishes Open Specifications documentation for protocols, file formats, languages, standards as well as overviews of the interaction among each of these technologies.
- **Copyrights.** This documentation is covered by Microsoft copyrights. Regardless of any other terms that are contained in the terms of use for the Microsoft website that hosts this documentation, you may make copies of it in order to develop implementations of the technologies described in the Open Specifications and may distribute portions of it in your implementations using these technologies or your documentation as necessary to properly document the implementation. You may also distribute in your implementation, with or without modification, any schema, IDL's, or code samples that are included in the documentation. This permission also applies to any documents that are referenced in the Open Specifications.
- **No Trade Secrets.** Microsoft does not claim any trade secret rights in this documentation.
- **Patents.** Microsoft has patents that may cover your implementations of the technologies described in the Open Specifications. Neither this notice nor Microsoft's delivery of the documentation grants any licenses under those or any other Microsoft patents. However, a given Open Specification may be covered by Microsoft's Open Specification Promise (available here: <http://www.microsoft.com/interop/osp>) or the Community Promise (available here: <http://www.microsoft.com/interop/cp/default.mspx>). If you would prefer a written license, or if the technologies described in the Open Specifications are not covered by the Open Specifications Promise or Community Promise, as applicable, patent licenses are available by contacting iplq@microsoft.com.
- **Trademarks.** The names of companies and products contained in this documentation may be covered by trademarks or similar intellectual property rights. This notice does not grant any licenses under those rights.
- **Fictitious Names.** The example companies, organizations, products, domain names, e-mail addresses, logos, people, places, and events depicted in this documentation are fictitious. No association with any real company, organization, product, domain name, email address, logo, person, place, or event is intended or should be inferred.

Reservation of Rights. All other rights are reserved, and this notice does not grant any rights other than specifically described above, whether by implication, estoppel, or otherwise.

Tools. The Open Specifications do not require the use of Microsoft programming tools or programming environments in order for you to develop an implementation. If you have access to Microsoft programming tools and environments you are free to take advantage of them. Certain Open Specifications are intended for use in conjunction with publicly available standard specifications and network programming art, and assumes that the reader either is familiar with the aforementioned material or has immediate access to it.

Revision Summary

Date	Revision History	Revision Class	Comments
11/06/2009	0.1	Major	Initial Availability
02/19/2010	1.0	Major	Updated and revised the technical content
03/31/2010	1.01	Editorial	Revised and edited the technical content
04/30/2010	1.02	Major	Updated and revised the technical content
06/07/2010	1.03	Editorial	Revised and edited the technical content
06/29/2010	1.04	Editorial	Changed language and formatting in the technical content.
07/23/2010	1.04	No change	No changes to the meaning, language, or formatting of the technical content.
09/27/2010	1.04	No change	No changes to the meaning, language, or formatting of the technical content.
11/15/2010	1.04	No change	No changes to the meaning, language, or formatting of the technical content.
12/17/2010	1.05	Minor	Clarified the meaning of the technical content.
03/18/2011	1.05	No change	No changes to the meaning, language, or formatting of the technical content.
06/10/2011	1.05	No change	No changes to the meaning, language, or formatting of the technical content.

1 Introduction

This document specifies the Input Normalization Data Structure, which contains the corresponding equivalent characters for the characters that are used within a search application, as well as the root form to be added depending on the language of the item.

1.1 Glossary

The following terms are defined in [\[MS-OFCGLOS\]](#):

item processing
NFC normalization
NFKC normalization
query processing
stemming
tokenization

The following terms are specific to this document:

MAY, SHOULD, MUST, SHOULD NOT, MUST NOT: These terms (in all caps) are used as described in [\[RFC2119\]](#). All statements of optional behavior use either MAY, SHOULD, or SHOULD NOT.

1.2 References

1.2.1 Normative References

We conduct frequent surveys of the normative references to assure their continued availability. If you have any issue with finding a normative reference, please contact dochelp@microsoft.com. We will assist you in finding the relevant information. Please check the archive site, <http://msdn2.microsoft.com/en-us/library/E4BD6494-06AD-4aed-9823-445E921C9624>, as an additional source.

1.3 Structure Overview (Synopsis)

This document specifies equivalent characters used for normalization and **tokenization**. This information is relevant during two steps. First, when an item is indexed, the characters of the words are normalized. Second, the query term is normalized in the same way. Both normalization steps assure that equivalent characters have a unique binary representation throughout **item processing** and **query processing**, as mentioned in the references in the following section. Identical mappings are used for proper functioning.

This document also specifies additional equivalences used when indexing. Additionally, this document specifies a language-dependent type of stem form that is used during **stemming**. Whereas character normalization applies to characters, stemming applies to words.

1.4 Relationship to Protocols and Other Structures

The equivalent characters and stemming as specified in this protocol are used in item processing as described in [\[MS-FSFIXML\]](#) and in query processing as described in [\[MS-FSDQE\]](#).

1.5 Applicability Statement

Use the specified character equivalences in the search application to get consistent results when indexing and searching in Unicode text. This assures that equivalent strings have a unique binary representation.

For stemming, in the search application add the form required by the language of the processed item to improve recall.

1.6 Versioning and Localization

None.

1.7 Vendor-Extensible Fields

None.

2 Structures

2.1 Equivalent Characters (Language Normalization)

The following input normalization table specifies the corresponding equivalent characters or sequences of characters for characters used by structures in a search application as specified in [\[MS-FSFXML\]](#) and in [\[MS-FSDQE\]](#). The specified equivalences comprise **NFC normalization** and additional normalization, for example **NFKC normalization**. They also comprise tokenization.

For each character or sequence of characters given as Unicode code points in column 1 **Character or sequence**, column 2 **Equivalent** specifies the corresponding equivalent character or sequence of characters. In column 1, successive characters might be subsumed under ranges. Characters beyond the coverage of the table remain unchanged. An empty equivalent field means that the equivalent is nothing.

Character or sequence	Equivalent
U+0001 - U+002F	U+0020

2.2 Equivalent Characters (Generic Normalization)

The following input normalization table specifies the corresponding equivalent characters or sequences of characters for characters used by structures in a search application as specified in [\[MS-FSFXML\]](#) and in [\[MS-FSDQE\]](#).

The equivalences specified in this table offer a weaker normalization compared to those listed in the preceding section, also comprising tokenization.

For each character or sequence of characters given as Unicode code points in column 1 **Character or sequence**, column 2 **Equivalent** specifies the corresponding equivalent character or sequence of characters. In column 1, successive characters might be subsumed under ranges. Characters beyond the coverage of the table remain unchanged. An empty equivalent field means that the equivalent is nothing.

Character or sequence	Equivalent
U+0001 - U+002F	U+0020
U+003A - U+0040	U+0020
U+0041	U+0061

2.3 Stemming

Language-specific stemming SHOULD be applied to words that have one or more variations. Omission of stemming leads to lower recall. Stemming dictionaries are provided only for languages listed in the table. If additional stemming dictionaries are integrated, then higher recall is also expected for the respective language.

For languages for which stemming is available in the search application, dependent on the language of the item, either the base form or all variations of the word are added as "L"-suffix forms in the **a** element (for more details, see [\[MS-FSFXML\]](#) section 2.5.3.1.3). Ambiguous words have several base forms. For stems, character equivalences MUST be applied, as specified in section [2.1](#).

Stemming MUST be applied according to the language of the input text. Depending on the language, column 2 [\[ISO-639\]](#) **code**, column 3 **Stemming form** specifies the stemming forms to be added.

The following table MUST be used by structures in a search application as specified in [\[MS-FSFXML\]](#) and in [\[MS-FSDQE\]](#) when stemming applies.

Language	[ISO-639] code	Stemming form
Arabic	ar	Base form
Bengali, Bangla	bn	Variations
Bosnian	bs	Variations
Bulgarian	bg	Variations

Language	[ISO-639] code	Stemming form

Telugu	te	Variations
Turkish	tr	Base form
Ukrainian	uk	Base form
Urdu	ur	Variations

2.4 Equivalent Characters (Tokenization Modes "uri" and "site-url")

The following input normalization table specifies the corresponding equivalent characters or sequences of characters for characters used by structures in a search application as specified in [\[MS-FSFIXML\]](#) and in [\[MS-FSDQE\]](#).

The equivalences specified in this table describe special normalizations for URI properties. The mode "uri" is used for the managed property "meta.contentid". The mode "site-url" is used for the managed property "site". Note that the two modes only differ in the character U+002F, that is, a slash (/).

For each character or sequence of characters given as Unicode code points in column 1 Character or sequence, column 2 **Equivalent** for "uri" specifies the corresponding equivalent character or sequence of characters for the Tokenization Mode "uri" and column 3 **Equivalent** for "site-url" for "site-url" respectively. In column 1, successive characters might be subsumed under ranges. Characters beyond the coverage of the table remain unchanged. An empty equivalent field means that the equivalent is nothing.

Character or sequence	Equivalent for "uri"	Equivalent for "site-url"
U+0001 - U+0020	U+007F	U+007F
U+002F	U+002F	U+007F

3 Structure Examples

3.1 Character Normalization

Input: Pyrénées

Normalized string: pyrenees

3.2 Stemming: Expansions

Input: provençaux

Language: French

Variations: provençal provencale provencaux provencales

3.3 Stemming: Base Form

Input: yolu

Language: Turkish

Base form: yol

4 Security Considerations

None.

5 Appendix A: Product Behavior

The information in this specification is applicable to the following Microsoft products or supplemental software. References to product versions include released service packs:

- Microsoft® FAST™ Search Server 2010

Exceptions, if any, are noted below. If a service pack or Quick Fix Engineering (QFE) number appears with the product version, behavior changed in that service pack or QFE. The new behavior also applies to subsequent service packs of the product unless otherwise specified. If a product edition appears with the product version, behavior is different in that product edition.

Unless otherwise specified, any statement of optional behavior in this specification that is prescribed using the terms SHOULD or SHOULD NOT implies product behavior in accordance with the SHOULD or SHOULD NOT prescription. Unless otherwise specified, the term MAY implies that the product does not follow the prescription.

6 Change Tracking

No table of changes is available. The document is either new or has had no changes since its last release.
