## 1.3 Structure Overview

This file format specifies structures of macro-enabled WordprocessingML, SpreadsheetML, and PresentationML file formats that are either not present in or modified from non-macro-enabled WordprocessingML, SpreadsheetML, and PresentationML file formats specified in [\[ISO/IEC-29500:2008\]](#). **Document**, **Workbook**, and **Presentation** data are each contained in a compressed file (.zip) package conforming to the Open Packaging Conventions as specified in [\[ISO/IEC-29500-2\]](#). Individual files stored in a ZIP package, called parts ([\[ISO/IEC-29500-1\]](#)), contain information about the content and structure of a document, workbook, or presentation. Some parts ([\[ISO/IEC-29500-1\]](#)) store information using **XML** and other parts ([\[ISO/IEC-29500-1\]](#)) store information by using binary data.

Section [2](#) of this documentation is organized by application.

Section [2.1](#) covers the structures in the macro-enabled WordprocessingML file format that are either not present in or modified from the structures in the non-macro-enabled WordprocessingML file format specified in [\[ISO/IEC-29500:2008\]](#).

Section [2.2](#) covers the structures in the macro-enabled SpreadsheetML file format that are either not present in or modified from the structures in the non-macro-enabled SpreadsheetML file format specified in [\[ISO/IEC-29500:2008\]](#).

Section [2.3](#) covers the structures in the macro-enabled PresentationML file format that are either not present in or modified from the structures in the non-macro-enabled PresentationML file format specified in [\[ISO/IEC-29500:2008\]](#).

Within sections [2.1](#), [2.2](#), and [2.3](#), subsection 1 specifies the parts within the package of a macro-enabled file that are either not present in or modified from a non-macro-enabled file specified by [\[ISO/IEC-29500-1\]](#). Subsection 2 specifies extensions to [\[ISO/IEC-29500:2008\]](#) within the package ([\[ISO/IEC-29500-2\]](#)). Subsections 3, 4, 5, and 6 specify the details of the structures that are either not present in or are modified from the structures in the non-macro-enabled file formats specified by [\[ISO/IEC-29500:2008\]](#). Subsection 3 specifies global elements, subsection 4 specifies global attributes, subsection 5 specifies complex types, and subsection 6 specifies simple types.

Section [3](#) provides specific examples intended to illustrate the structures specified in section [2](#).

Section [4](#) discusses security issues relating to the structures specified by this document.

Section [6](#) is a list of version-specific behaviors. It is not intended to be read alone, but rather to be understood in the context of specifications in section [2](#).

## 1.4 Relationship to Protocols and Other Structures

The structures specified in section [2](#) are dependent on the structures and concepts defined in the following references:

- [\[ISO/IEC-29500-1\]](#) for baseline WordprocessingML, SpreadsheetML, and PresentationML persistence formats.
- [\[ISO/IEC-29500-2\]](#) for open packaging conventions.
- [\[ISO/IEC-29500-3\]](#) for markup compatibility and extensibility.
- [\[ISO/IEC-29500-4\]](#) for backward compatibility considerations.

## 1.5 Applicability Statement

This document specifies a persistence format for structures either not present in or modified from the structures specified by [\[ISO/IEC-29500:2008\]](#) for WordprocessingML, SpreadsheetML, and PresentationML documents. The structures specified in this document are not applicable as a stand-alone file format. Each structure specified in this document is integrated with [\[ISO/IEC-29500:2008\]](#) WordprocessingML, SpreadsheetML, or PresentationML documents in a particular way, as specified in the section for that structure.

## 1.6 Versioning and Localization

None.

## 1.7 Vendor-Extensible Fields

None.

## 2 Structures

All global elements, global attributes, complex types, and simple types not defined in [ISO/IEC-29500:2008](#) and not defined in the following target namespaces are extensions that use conventions specified by [ISO/IEC-29500-3](#):

- <http://schemas.microsoft.com/office/word/2006/wordml>
- <http://schemas.microsoft.com/office/excel/2006/main>
- <http://schemas.openxmlformats.org/presentationml/2006/main>

## 3 Structure Examples

### 3.1 VBA Supplemental Data Part

This example shows a usage of a Word **VBA Supplemental Data** part (section [2.1.1.3](#)). Consider the following XML, showing the complete contents of the **VBA Supplemental Data** part (section [2.1.1.3](#)) of a word-processing document.

```
<wne:vbaSuppData
  xmlns:ve="http://schemas.openxmlformats.org/markup-compatibility/2006"
  xmlns:o="urn:schemas-microsoft-com:office:office"
  xmlns:r="http://schemas.openxmlformats.org/officeDocument/2006/relationships"
  xmlns:m="http://schemas.openxmlformats.org/officeDocument/2006/math"
  xmlns:v="urn:schemas-microsoft-com:vm1"
  xmlns:wp="http://schemas.openxmlformats.org/drawingml/2006/wordprocessingDrawing"
  xmlns:w10="urn:schemas-microsoft-com:office:word"
  xmlns:w="http://schemas.openxmlformats.org/wordprocessingml/2006/main"
  xmlns:wne="http://schemas.microsoft.com/office/word/2006/wordml">
  <wne:docEvents>
    <wne:eventDocOpen/>
    <wne:eventDocXmlAfterInsert/>
  </wne:docEvents>
  <wne:mcds>
    <wne:mcd wne:macroName="PROJECT.NEWMACROS.MACRO1" wne:name="Project.NewMacros.Macro1"
wne:bEncrypt="00" wne:cmg="56"/>

</wne:vbaSuppData>
```

The **docEvents** child of the **vbaSuppData** element (section [2.1.3.1](#)) specifies that both the Open event and the XMLAfterInsert event are active for this document. The **mcds** element of the **vbaSuppData** element (section [2.1.3.1](#)) contains an **mcd** element that specifies macro information for the "Project.NewMacros.Macro1" macro.

### 3.2 Macro Sheet Part

This example shows a usage of an Excel **macro sheet** part (section [2.2.1.2](#)). Consider the following XML, showing the complete contents of a **macro sheet** part (section [2.2.1.2](#)) of a workbook.

```
<xm:macrosheet
  xmlns="http://schemas.openxmlformats.org/spreadsheetml/2006/main"
  xmlns:xm="http://schemas.microsoft.com/office/excel/2006/main"
  xmlns:r="http://schemas.openxmlformats.org/officeDocument/2006/relationships">
  <dimension ref="A1"/>
  <sheetViews>
    <sheetView showFormulas="1" tabSelected="1" workbookViewId="0">
      <selection activeCell="A2" sqref="A2"/>
    </sheetView>
  </sheetViews>
  <sheetFormatPr defaultRowHeight="15"/>
  <sheetData>
    <row r="1" spans="1:1">
      <c r="A1" t="b">
        <f>ACTIVATE () </f>
        <v>0</v>
      </c>
    </row>
```

```
</sheetData>  
<pageMargins left="0.7" right="0.7" top="0.75" bottom="0.75" header="0.3" footer="0.3"/>  
</xm:macrosheet>
```

The **macrosheet** element (section [2.2.3.1](#)) specifies the macro sheet. A formula following the grammar specified in section [2.2.7](#) is specified by the **f** element ([\[ISO/IEC-29500-1\]](#) section 18.17).

## 6 Appendix B: Product Behavior

The information in this specification is applicable to the following Microsoft products or supplemental software. References to product versions include released service packs:

- Microsoft® Office 2010 suites
- Microsoft® Visual Basic® for Applications 6.0 (VBA 6.0)
- Microsoft® Visual Basic® for Applications 7.0 (VBA 7.0)

Exceptions, if any, are noted below. If a service pack or Quick Fix Engineering (QFE) number appears with the product version, behavior changed in that service pack or QFE. The new behavior also applies to subsequent service packs of the product unless otherwise specified. If a product edition appears with the product version, behavior is different in that product edition.

Unless otherwise specified, any statement of optional behavior in this specification that is prescribed using the terms SHOULD or SHOULD NOT implies product behavior in accordance with the SHOULD or SHOULD NOT prescription. Unless otherwise specified, the term MAY implies that the product does not follow the prescription.
